Summary

Design engineer and full-stack product builder with 5+ years of experience building polished, high-performance web products and developer tools. Strong in React, TypeScript, Next.js, Motion, design systems, accessibility, performance, Node.js, and Cloudflare. Built products used by 25,000+ active users, grew beUI to 1,700+ GitHub stars, and launched beUI Pro to \$20K+ in revenue. Open-source contributor to wagmi, mppx, and Tempo Accounts.

Experience

Frontend Engineer

Jun 2024 – Present

Nodeops

Bengaluru, IN

- Built and owned the Nodeops Console frontend from the ground up with React and TypeScript, supporting 25,000+ active users across core product workflows.
- Designed and maintained a shared component library adopted across 3+ internal products, reducing feature development time by approximately 30% and improving UI consistency.
- Built a Telegram workflow for non-technical users to deploy and manage blockchain nodes directly from chat, reducing onboarding friction.
- Shipped a Telegram trading bot used by 2,000+ users, supporting token swaps, limit orders, and cross-chain bridging across multiple networks.

SDE 2 – Frontend

Aug 2022 – Apr 2024

Bitbns

Bengaluru, IN

- Led end-to-end frontend development of the Bitdroplet decentralized application, contributing to a 25% increase in user engagement.
- Built core Playota features including on-chain game logic, referral systems, wallet authentication, and user profiles.
- Reduced page load time by 60% across key pages, contributing to a 20% engagement lift and 15% growth in active users.
- Implemented secure wallet integrations with Web3.js and WalletConnect across multiple DeFi products.
- Tech Stack: React, Next.js, Svelte, React Native, Web3.js, WalletConnect

Full Stack Developer

Aug 2021 – Jul 2022

Linkedphone

Hyderabad, IN

- Built a customer support ticketing system with JavaScript and Node.js while maintaining 100% uptime.
- Built a real-time WebSocket API on AWS Lambda and API Gateway for live event processing.
- Partnered with design to improve product UI and increase conversion by 25%.
- Tech Stack: JavaScript, jQuery, Node.js, AWS, WebSockets

Projects

beUI / beUI Pro | React, Next.js, TypeScript, Motion, Tailwind CSS

2026

- Built and maintain beUI, an open-source motion component library and product-ready block system for React and Next.js, distributed through registry endpoints and agent-friendly install routes.
- Grew beUI to 1,700+ GitHub stars and launched beUI Pro, a paid companion with production-ready components, blocks, and templates that generated \$20K+ in revenue. Link: beui.dev / pro.beui.dev

Wave | React Native, TypeScript, Node.js, Solana

2024

- Built a Solana social trading app combining real-time messaging, native crypto payments, wallet signing, token transfers, and on-chain identity; reached 300+ users. Link: usewave.app

Tracwell | Next.js, React, TypeScript, Hono, Cloudflare, ClickHouse

2026

- Built a privacy-conscious product and website analytics platform for traffic, signups, revenue, funnels, imports, exports, and agent-readable reporting.
- Designed the full-stack monorepo across the dashboard, Hono API, browser and React Native SDKs, Cloudflare collector and Queue pipeline, ClickHouse reports, D1 control plane, billing, and MCP access. Link: tracwell.app

Agent Wallet and Payment Tooling | TypeScript, Rust, MPP, Solana, EVM

2025 – 2026

- Built agent-operator, a TypeScript SDK for policy-controlled agent wallets with spending limits, alerts, and human approval flows, plus Relay CLI, a Rust tool for cross-chain swaps and bridging.
- Built additional Tempo, MPP, and AI-agent projects including Sentinel, MPP Playground, StealthPay, Programmable Virtual Addresses, and mppx-proxy. Link: agent-operator / relay-cli

Technical Skills

Languages: JavaScript, TypeScript, Rust, Swift, Solidity, SQL

Frontend: React, Next.js, React Native, Svelte, Tailwind CSS, Motion, accessibility

Backend & Infrastructure: Node.js, Hono, REST, WebSockets, AWS Lambda, Cloudflare Workers, D1, R2

Blockchain & Tools: Solana, EVM, Web3.js, viem, wagmi, WalletConnect, MCP, Git, Ollama, Telegram Bot API
